REPORT 1 — Country Performance: Sales & Profit Distribution

2013–2014

USA	Canada	France	Germany
$25.03M	**$24.89M**	**$24.35M**	**$23.51M**
22.38% of profit	*21.79% of profit*	*20.89% of profit*	*17.75% of profit*

Gross Sales minus Discount — Country Bar Chart

Gross Sales minus Discount ($M)

Profit Breakdown: France 22.38% ($3.78M) | Germany 21.79% ($3.68M) | Canada 20.89% ($3.53M) | USA 17.75% ($3.00M) | Mexico 17.21% ($2.91M)

KEY INSIGHTS

- USA leads Gross Sales at $25.03M (22.38% share) — the single largest revenue market.
- France leads PROFIT share at 22.38% ($3.78M) despite ranking 3rd in gross sales — indicating superior cost management.
- Mexico has the lowest gross sales ($20.95M) AND lowest profit share (17.21% / $2.91M) — a dual underperformance.
- The top-bottom spread is narrow ($25.03M vs $20.95M = $4.08M gap), showing relatively balanced geographic distribution.
- Germany ranks 4th in gross sales but 2nd in profit — cost efficiency improving its profit ranking.

DECISIONS

1. Investigate France's superior cost structure — replicate practices across other markets to lift all margins.
2. Launch a Mexico growth plan: targeted sales campaigns to close the $4M revenue gap with USA.
3. Audit Germany and USA discount strategies to protect margin from Gross-to-Profit leakage.

P&L Waterfall: Gross Sales → Deductions → Net Income

Monthly Breakdown (sample): Sep-2013: COGS -$3.72M, Disc -$245K, Gross $4.73M | Oct-2013: COGS -$7.64M, Disc -$533K, Gross $9.83M | Total Net: $10.50M

Source: Power BI Financial Analysis Dashboard | Financial Analysis Portfolio Project

P&L INSIGHTS

- COGS ($102M) is 79.6% of Gross Sales ($128M) — the single largest profit destroyer, consuming 80 cents of every revenue dollar.
- Discounts of $9M (7% of Gross) further compress revenue before COGS is applied.
- Other Expenses of $6M add a third layer of cost, leaving only $10.5M (8.21%) as Net Income.
- The P&L structure reveals a high-volume, low-margin business model typical of FMCG or commodity product distribution.
- November 2013 carried the highest single-month discount burden at -$900K.

DECISIONS

1. Target COGS reduction of 3–5%: renegotiate supplier contracts, review manufacturing efficiency, and explore bulk purchasing agreements to save $3–5M annually.

2. Cap discount policy at 6% of Gross: current 7% discount rate is eroding revenue unnecessarily. Implement tiered discount approval thresholds.

3. Audit Other Expenses monthly: identify and eliminate discretionary costs within the $6M envelope.

NET TOTAL	1.58	2.01	2.16	4.75	10.50

2013–2014 Sales Trend — Gross Sales by Year-Month

Q4 2014 spike visible (Oct $23.1M, Nov $14.1M, Dec $18.3M) | Q1 2014 = steadiest quarter

← Sep 2013 Dec 2014 →

QUARTERLY INSIGHTS

- Q4 dominates with $55.60M in Gross Sales — 43.5% of the full-year total in one quarter.
- COGS in Q4 jumped to $44.16M — nearly double Q3 ($21.35M), suggesting a Q4 bulk production or procurement surge.
- Net Profit grew sequentially: Q1 $1.58M → Q2 $2.01M → Q3 $2.16M → Q4 $4.75M.
- Discount pressure also peaks in Q4 (-$3.91M), likely linked to year-end promotional pricing.
- Q3 Gross Sales ($26.73M) exceeded Q2 ($24.47M) by 9.2% — mid-year momentum building.

DECISIONS

1. Build a Q4 readiness plan: pre-negotiate COGS rates for the Q4 production surge to avoid the cost spike that compresses Q4 margins.

2. Investigate Q4 discount approvals — $3.91M in discounts on $55.60M of Q4 sales (7%) needs a review of who authorised these discounts and whether they were necessary.

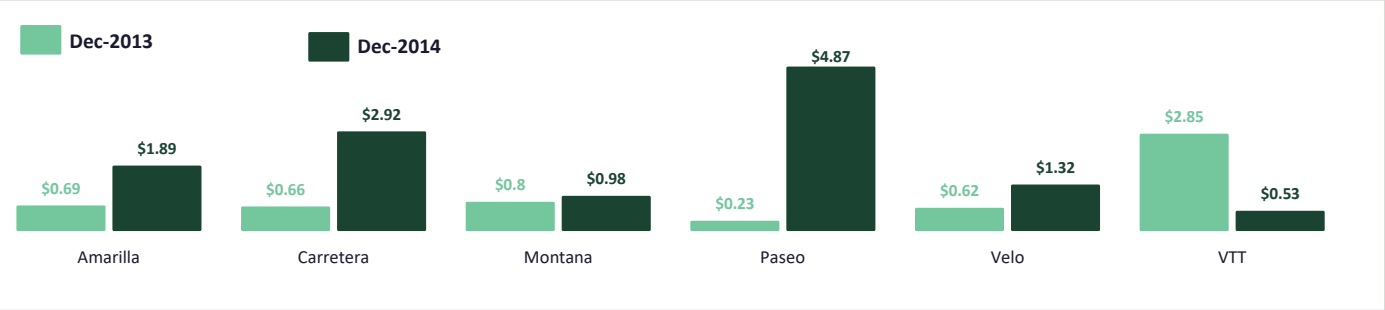
D13:$0.23M D14:$4.87M	D13:$2.85M D14:$0.53M	D13:$0.62M D14:$1.32M	D13:$0.69M D14:$1.89M	D13:$0.80M

December Year-on-Year Comparison: Dec-2013 vs Dec-2014 Sales



$5.84M | Dec-2013 Total	$12.51M | Dec-2014 Total	$28.56M | Full-2013 Sales	$99.37M | Full-2014 Sales

PRODUCT INSIGHTS

- Paseo is the undisputed top product at $33.01M total sales — 27.8% of all revenue.
- Dec-2014 was $12.51M vs Dec-2013 at $5.84M — a 114% December growth year-on-year.
- Full-year 2014 ($99.37M) vs 2013 ($28.56M) — 248% annual growth, extraordinary expansion.
- VTT reversed dramatically: $2.85M (Dec-2013) to $0.53M (Dec-2014) — significant demand shift.
- Paseo Dec-2014: $4.87M vs $0.23M in Dec-2013 — the star performer of December.
- Canada contributes 21% of sales across all products, aligning with its national share.

DECISIONS

1. Protect and grow Paseo: it contributes 27.8% of revenue. Ensure supply chain security and invest in targeted Paseo marketing across all 5 countries.
2. Investigate VTT's December collapse (-$2.32M): was this a supply issue, demand shift, or seasonal change? Plan Q4 2014 mitigation strategy.
3. Carretera grew 342% in December (Dec-2014: $2.92M vs Dec-2013: $0.66M) — investigate the growth driver and replicate.

Product Monthly Sales Matrix ($ — Selected Periods)

YearMth	Amarilla	Carretera	Montana	Paseo	Velo	VTT
2013-09	299,625	516,645	2,111,850	718,053	143,465	940,098
2013-10	2,635,583	313,521	326,232	1,484,692	3,603,550	1,465,110
2014-12	1,891,125	2,916,106	983,825	4,865,229	1,322,038	529,945

COST INSIGHTS

- COGS at 79.6% of Gross is the dominant cost driver — industry best-practice targets 60–70% for consumer goods.
- Total Cost at 91.79% of Revenue leaves only 8.21% as Gross Margin — dangerously thin for most sectors.
- Avg Selling Price of $113.64 suggests a mid-tier consumer product segment with significant volume dependency.
- Profit of $16.89M on $127.93M revenue is positive but structurally fragile — any COGS increase above 82% triggers losses.
- The 7.2% discount rate is compressing net revenue by $9.21M — a controllable leakage.

DECISIONS

1. COGS reduction programme: negotiate a minimum 3% COGS reduction target. On $102M COGS base, 3% = $3.06M additional profit — nearly doubling net income.
2. Raise average selling price by $5–10 (to $118–124) across high-volume products like Paseo to improve per-unit margin without volume loss.
3. Eliminate the bottom discount tier — removing discounts below $1K transaction value could save $1–2M annually with minimal volume impact.
